Wonderful place for kids to learn and glow. I can see a striking change in my child's attitude to solve her math problems and exercise. A very competitive and comprehensive study material followed by personal guidance from Dr. B and his very efficient team. I specifically liked the way Dr. B deal with child's psychology and encourage them to understand and solve any tricky question. Thank you, Dr. B, you not only instilled a "I can do it" attitude in my child but also your tips helped me become a better guide for my child at home. You are a very successful mentor not only for your students but also their parents. Thank you for all your efforts with your students.

I took the SAT in August and I did quite well (1530). This is because of Dr. B and his staff who helped me throughout the journey. When I joined, I was getting 1200s and after completing the 40 sessions SAT PROGRAM I improved my score by more than 300 points. I would like to thank Dr. B for his patience that he had when dealing with me, especially the Geometry and Algebra 2 topics that I hadn't covered in school. I would like to thank Mr. Satyen who gave me good attention when I had questions. If you are the type of student who likes to work hard but needs proper guidance, then this is the place to go.

When I started my SAT journey, I was very unsure and unprepared. Enrolling in Scholar Tutorials was one of the best decisions that I have made for my SAT preparations. Dr. Baldev was very supportive and worked with me throughout the course to overcome my weaknesses and further improve my strengths. He was very patient and understanding. When I started the program, my SAT score was in the 1600s, but with his guidance, I surpassed the 2100 mark. I would highly recommend Scholar Tutorials for anyone who is serious about their SAT preparations.

Scholar Tutorials pinpoints each student's weaknesses and adjusts the tutoring to meet his or her needs. Dr. Baldev has a multitude of resources to help students master the topics they need help with and offers motivation to those who need it. In the SAT course, I learned many tricks and tips that helped me increase my score from 1870 on practice tests to a 2200 on my first official test. I took geometry course in 9th grade and I am currently taking the pre-calculus course, both of which are immensely helpful. I definitely recommend going to Scholars for tutoring.

I found out about Scholar Tutorials very late in my preparation for the SAT. Yet, that did not deter Dr. Baldev in pushing me hard to achieve the score that he knew I could achieve. By the time I had given my 2nd SAT, I had lost hope that my score could ever cross 2000. But Dr. Baldev continued to make me work hard. In the end, it was because of his motivation and guidance that I scored 2100 in my 3rd SAT. If I had known about Scholar Tutorials a little earlier, I am sure I would have scored even higher. Dr. Baldev focuses on each student's individual needs in each topic; he focuses on our weakness and provides us with lessons on the topic and practice from many sources to truly get the topic. I strongly recommend anyone preparing for the SAT to join Scholar Tutorials before it is too late.

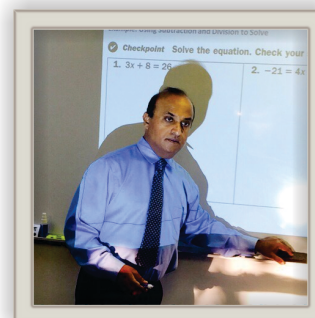

FOUNDER & ACADEMIC DIRECTOR

Prashant Baldev
Ed.D., Doctor of Education
Rutgers University

Founder and Academic Director of Scholar Tutorials, Dr. Prashant Baldev, Ed.D., Doctor of Education, Rutgers University, formulates and implements all PSAT/SAT/ACT Test Prep Programs. He has over 3 decades of professional teaching experience and gives personal attention to each individual student at Scholar Tutorials. His dissertation thesis titled "Urban Students Developing Algebraic Ideas in an Informal After-School Program" helped him to understand the learning needs of students outside of school. He has been a Research Associate at Robert B. Davis Institute of Learning, Graduate School of Education, Rutgers University.

Dr. Baldev discounts the Behaviorist Theory of Learning that emphasizes changes in behavior that results from external stimulus-response associations made by the learner. He rejects the view that a learner is essentially passive responding to environmental stimuli. He believes in the Constructivist Theory of Learning where learning is an active process in which learners construct new ideas or concepts based upon their current/past knowledge. He suggests that humans have an inherent passion for knowledge and the goal of education is to create the appropriate learning environment for learners to build, share and revise their ideas. He loves talking about these theories and enjoys implementing the related concepts at Scholar Tutorials.

Scholar Tutorials® aims at creating happy and confident students who love to learn!

SAT SUBJECT TESTS

WHO NEEDS TO TAKE A SUBJECT TEST?

If you are applying to selective colleges, you'll probably need to submit scores from at least two SAT Subject Tests. As you develop your college list, keep track of each school's admission requirements. If you're not sure where you're going to apply yet, plan to take at least two SAT Subject Tests, and remember that if a school "recommends" Subject Tests, you should go ahead and take them.

WHAT SUBJECT TESTS ARE AVAILABLE?

Tests are available in the following subjects:

- Math (Level 1 or Level 2),
- Biology-E/M, Chemistry or Physics,
- English Literature,

How are SAT Subject Tests scored?

Each Subject Test is scored on a 200–800 scale.

What are good SAT Subject Test scores?

That depends on the school to which you are applying. Many colleges are happy with scores of 650 or above, but highly selective schools may want to see a 700 or 750—or even higher—in the case of Math Level 2.

Why Take SAT Subject Tests?

Here are four reasons you should consider them.

- Showcase Your Strengths
- Show Interest in a Major
- Some Colleges Require Them
- Get College Credit
